REASONS FOR ALLOWANCE

1. In response to applicant's amendment filed 3/1/2004, claims 17, 86 and 94 were amended to incorporate all the limitations of the objected claims 18 and 93, and claims 18 and 93 have been canceled. Applicant's arguments have been carefully considered and found persuasive in that "Chang Hasnain fails to teach a non-planar etalon having at least one non-planar surface... In other words, the surfaces of Chang-Hasnain's wedged etalon are planar, or flat." Claims 1-17, 19-92 and 94 are pending and allowed.

2. The following is an examiner's statement of reasons for allowance:

The cited prior art do not teach or fairly suggest a laser system comprising, along with all the other claimed features, at least one of the following: (a) a non-planar etalon for forming a fringe pattern and a detector unit for detecting the pattern's portions; (b) a non-parallel etalon receiving a portion of the laser light from the beamsplitter while a fiber receives the main portion of laser light from the beamsplitter; (c) a detector **unit** to detect at least first and second portions of the fringe pattern from an etalon mounted to provide at least translational and tilt adjustments of the etalon relative to the light output; and (d) a control unit including a memory unit storing information relating magnitudes of the one or more tuning signals to a set of laser operating wavelengths.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
